

Your lasting legacy

Protecting the
future of excellence
in medical science

A gift in your will to the Academy of Medical Sciences can
play a lasting role in the health of future generations

Investing in medical science for future generations

Medical and health research is vital for the health of the public. Since our founding in 1998, the Academy has been championing medical science and the translation of developments in research into healthcare treatments for the benefit of patients and the public.

Our Fellows and global network of leading experts provide us with a unique and diverse knowledge base. With their expertise, we can identify where the Academy will add the most value to help achieve good health for all – from running impactful research programmes, to supporting the next generation of leading researchers in their work and careers, to influencing policy decisions.

The COVID-19 pandemic demonstrated the impact that poor health has on people and the economy. The pandemic highlighted the importance of the Academy's work promoting long-term investment in health research to deliver scientific breakthroughs for better healthcare.

It was the investment in science that ultimately led to effective COVID-19 vaccines and treatments.

"The work of the Academy of Medical Sciences is vital to the future success of biomedical research and how it translates into a healthcare setting. The Academy's commitment to improving people's health through the investment of the next generation of researchers and research leaders and shaping public policy will benefit many generations to come.

I am proud to support the Academy by pledging to leave a gift in my will."

Sir Cyril Chantler FMedSci, Academy Fellow and donor

Your lasting legacy

Philanthropic donations are vital for our income and sustainability for the future.

Donations through gifts in wills that are not restricted to a particular area of the Academy's work provide us with the flexibility to respond to the most pressing challenges facing the health of our society.

They allow us to invest in our long-term strategic priorities, such as nurturing the next generation of researchers, and ensure we can maintain our independent, expert voice to provide policy advice and champion science to improve lives.

By leaving a gift in your will, you are creating a legacy that will protect biomedical and health research excellence for the benefit of generations to come.

Through your legacy, you'll continue to play a significant part in our efforts to create, and sustain, an open and progressive research sector to help improve the health of people everywhere. After taking care of your loved ones, please consider leaving a gift in your will to the Academy of Medical Sciences. Thank you.

Yes, I'm interested in protecting the future of medical science with a gift in my will.

If you would like to request our Gifts in Wills Guide, please complete and return this form.

☐ I am considering leaving a gift in my will to the Academy of Medical Sciences.
Please send me your free Gifts in Wills Guide.
