

## **Open Access policy**

---

The Academy's mission is to promote medical science and its translation into benefits for society. We believe that unrestricted online access to scientific publications for all - Open Access (OA) - supports this ambition. We therefore work to build awareness of, and support for, OA amongst our Fellows and awardees.

The Academy's commitment to OA is demonstrated by its membership of the OA repository Europe PMC. Europe PMC is a free database of life sciences and biomedical research information, which includes over 3.4 million full text articles and over 30 million abstracts.

As a research funder, we require that awardees:

- Ensure that peer-reviewed, original research publications are available immediately upon publication, if possible, or otherwise within six months of the publication date on Europe PMC, through utilising either a Gold or Green route to OA. For more information on journal Open Access routes, visit the [Europe PMC website](#) and the [RoMEO Journals database](#). Log in details will be sent to all award holders so that they are able to deposit a manuscript via Europe PMC plus.
- Many academic journals will make a published article OA if an article processing charge (APC) is paid. While the Academy will not fund APC fees separately from our research award, applicants may cost APC fees in their grant applications and where a publication has been funded wholly by the Academy of Medical Sciences, underspend on an AMS grant may also be used to meet the cost.
- Where possible, awardees should seek to retain copyright. Adopting a Creative Commons Attribution (CC-BY) license is recommended as it enables re-use of publications via text- and data-mining.

Certain award holders may be able to use the [Charity Open Access Fund](#) (COAF) to pay for APC fees. To qualify as eligible, your award must be based in one of the [36 eligible institutions](#) and your award must have been co-funded by one of the seven partner charities (currently, Arthritis Research UK, Bloodwise, Breast Cancer Now, British Heart Foundation, Cancer Research UK, Parkinson's UK and the Wellcome Trust). Furthermore, to qualify for this, award holders must ensure that the supporters of the scheme are acknowledged in any publications as outlined in the relevant award's Terms and Conditions.
