

---

## **17 Mar 2016 A stratified approach to cardiovascular disease: exemplar clinical pathways**

A joint roundtable with NHS England to explore stratification of particular cardiovascular diseases. This follows a previous roundtable on clinical pathways for stratification of diabetes.

---

## **6 Apr 2016 2016 FORUM Annual Lecture: 'What can research do to improve productivity in the NHS?'**

Keynote lecture by Dame Julie Moore, Chief Executive, University Hospitals Birmingham NHS Foundation Trust, followed by a panel discussion.

---

## **16 Sept 2016 Influencing the trajectories of ageing**

A symposium to explore the current developments in ageing research and how this science can be used for decision-making by better predicting longevity and health.

---

## **Autumn 2016 UK drug discovery landscape**

A meeting with the ABPI to explore the current environment for drug discovery in the UK, based on the findings of a forthcoming ABPI survey.

---

## **5 Oct 2016 Health economics for stratified medicine**

A joint workshop with the Pharmacogenetics and Stratified Medicine Network to explore the health economics for, and 'value' of, stratified medicines.

---

## **1 Nov 2016 Regulation and governance of health research: five years on**

Reviewing the current environment for health research in the UK; five years on from the Academy's 'Regulation and Governance of Health Research' report. In partnership with Cancer Research UK and the Wellcome Trust.

---

## **Winter 2016 Geographical clusters: collaboration for innovation**

To build upon our previous work in partnership with the Wellcome Trust exploring the ways in which geographical clusters can work together to drive medical research and innovation.

Attendance at these events is by invitation only. If you are interested in attending please contact [FORUM@acmedsci.ac.uk](mailto:FORUM@acmedsci.ac.uk).

# Support the FORUM

---

The Academy's FORUM has the power to bring together senior leaders from across the life sciences sectors to accelerate progress through collaboration and innovation. Such a network, with its ability to convene individuals from universities, medical schools, biotech, pharma, regulators, healthcare providers, professional bodies, funders, and others is not replicated in any other organisation.

The success of the FORUM relies on supporter organisations who make an annual donation. These donations enable the Academy to deliver a programme of high profile meetings every year, including a prestigious annual lecture. The events provide an independent platform for dialogue allowing participants to take forward discussions on scientific opportunities, translational challenges and strategic choices in healthcare.

FORUM supporters are invited to shape the programme of future meetings, highlighting their priorities and driving the agenda.

**Event reports and further information can be found at:  
[www.acmedsci.ac.uk/FORUM-events](http://www.acmedsci.ac.uk/FORUM-events)**

To discuss how your organisation can join the network of FORUM supporters please contact [sarah.porter@acmedsci.ac.uk](mailto:sarah.porter@acmedsci.ac.uk)

The logo for the FORUM, featuring the word "FORUM" in a bold, red, sans-serif font. Above the letter "U" are three red speech bubbles of varying sizes, arranged in a cluster.
