

The University of Dundee School of Medicine

Implemented Activities

Webpage Development:

- Aimed to raise awareness of opportunities for the Student Research Society and the establishment of a Research Notice Board.

Journal Clubs:

- Existing clubs were developed to include senior peers and link topics to teaching activities.

Skills Workshops:

- These workshops focussed on generic research skills.

Themed DCAT:

- A reorganising of existing research opportunities by specialty area. Leads were identified to deliver research events and coordinate student applications to projects.

E-Learning:

- New E-learning resources were developed by funding two summer studentships.

Research Awareness Events that built on existing events.

The DRAMS Research Showcase:

- Highlighted research projects available within the school.

Discovering Research:

- An annual student-run event involving poster presentations. Students presenting were involved in a research project.

Academic Foundation Talks.
