

Thriving in a multi-disciplinary research team

10:30-17:30, Wednesday 11 September 2019

Darwin room, Centre for Life, Newcastle

This event will be inspirational to early career researchers working within a multi-disciplinary environment. It will provide a unique opportunity for networking with peers and senior academics and clinicians. We look forward to seeing you there.

The event will be chaired by **Professor Christine Harrison FMedSci**, Professor of Childhood Cancer Cytogenetics at Newcastle University and the Academy's North East Regional Champion and Springboard Champion.

Our keynote speaker will be **Professor Sir John Burn FMedSci**, Professor of Clinical Genetics at Newcastle University, Chairman of Newcastle Hospitals NHS Foundation Trust and Chairman of QuantuMDx; a life science tools and diagnostics company. With experience working across the biomedical and health sector, he will be talking about **'Retaining your edge in a multi-disciplinary environment'**.

The event will also include:

- Inspiring talks from early-mid career researchers on their experiences of defining a niche and working in diverse teams.
- Career development training from a professional facilitator.
- Interactive discussions with other researchers at a similar stage of their career.

**BOOK
NOW**

Book now to secure your opportunity to hear top tips from successful researchers at all stages of their career, learn new skills, meet potential collaborators and expand your support network.
